

BLR
PERFORMANCE INNOVATION

**BEECH
1900C/D**

BLR/MT Whisper Prop[®]

EASA, Transport Canada, and FAA Certified

The 5 bladed MT/BLR Whisper Prop is highly engineered to be the smallest diameter, quietest, and most advanced composite prop on the market. The Whisper Prop is constructed with a natural composite core that is protected with the latest advancement in fabric skins from a combination of carbon fiber and glass fiber. The composite core reduces vibration by more than 50% and decreases the overall wear and cost compared to a foam core composite blade. Each blade is finished with a nickel cobalt leading edge providing unsurpassed erosion and damage resistance. The Beech 1900C/D Whisper Prop is manufactured by MT Propeller, the world's most innovative aircraft propeller company.

BEYOND BENEFITS

Unlimited Blade Life

Field Repairable Blades

Shorter Blade Diameter

Dramatic Reduction in Noise and Vibration

Reduced Foreign Object Damage (FOD) Occurrence

Nickel-Cobalt Leading Edge Protection – Toughest Available

Lower Maintenance Costs

No Ground RPM Limitations

No Intermediate Inspections Needed

Improved Take-Off Performance

No Costly ADs
